COVERED AREA

MYPÜKA® HOUSE 350 is a modular unit designed for premium hospitality, conceived to accommodate up to 4 people. It features two independent bedrooms and clearly defined zones, including an integrated living/dining area and an outdoor lounge that enhances the living experience.

KEY ADVANTAGES

- Rapid installation
- Expandable modular system
- Replaceable components
- High structural resistance
- Optimised transport
- Ideal for glamping and hospitality

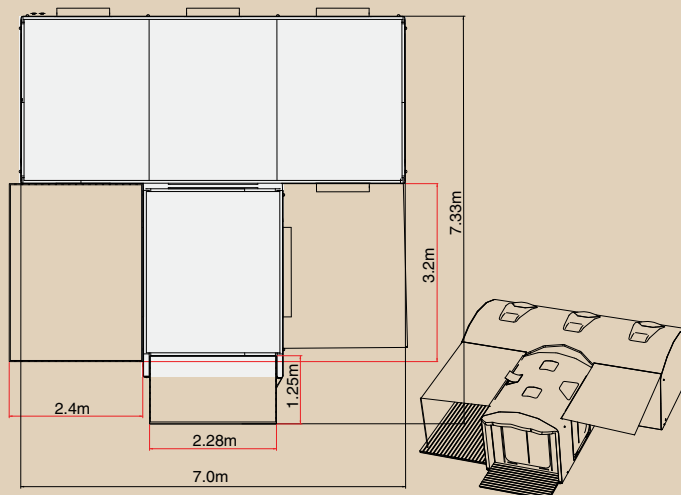

MATERIALS

- Double-layer dropstitch fabric
- High-tenacity polyester internal filaments
- PVC coating on both sides
- PVC/TPU reinforcement bands in high-stress areas
- High-frequency welded seams (HF welding)
- Halkey-Roberts (HR) inflation valve
- Transparent PVC or TPU panels (windows)
- Polyester mesh (mosquito nets / ventilation)
- Reinforced anti-slip PVC base (floor)

SPECIFICATIONS

Usable area	35 m ²
Internal height	2,8 m
Capacity	4 persons
Set-up time	8' - 10'
System	Modular

DIMENSIONS

OPERATIONAL ADVANTAGES

- Fast installation without heavy machinery
- Modular repair by individual components
- Low maintenance
- Efficient transport
- Reversible installation (minimal ground impact)

APPLICATIONS

- Resorts
- Glamping
- Eco-lodges
- Premium hospitality
- Rural tourism

THE ACCOMMODATION THAT DOES NOT REQUIRE PERMISSION TO INNOVATE

A new paradigm in hospitality through “Smart Assets for resorts”, where accommodation is no longer a fixed infrastructure but a flexible, modular and reversible system that transforms land into premium revenue without construction.

It removes traditional barriers in the sector, enabling operators to continuously adapt, evolve and optimise their offering, activating existing land with maximum efficiency while preserving its future potential.
